Advances in Computer, Information, and Systems Sciences, and Engineering

Proceedings of IETA 2005, TeNe 2005 and EIAE 2005

The conference proceedings of International Conference on Industrial Electronics, Technology & Automation (**IETA 2005**), International Conference on Telecommunications and Networking (**TeNe 2005**) and International Conference on Engineering Education, Instructional Technology, Assessment, and E-learning (**EIAE 2005**) include a set of rigorously reviewed world-class manuscripts addressing and detailing state-of-the-art research projects in the areas of: Industrial Electronics, Technology and Automation, Telecommunications, Networking, Engineering Education, Instructional Technology and e-Learning.

The three conferences, (IETA 05, TENE 05 and EIAE 05) were part of the International Joint Conference on Computer, Information, and System Sciences, and Engineering (CISSE 2005).

All aspects of the conference were managed on-line; not only the reviewing, submissions and registration processes; but also the actual conference. Conference participants - authors, presenters and attendees - only needed an internet connection and sound available on their computers in order to be able to contribute and participate in this international ground-breaking conference. Suffice to say that CISSE received submissions from more than 50 countries, for whose researchers, this opportunity presented a much more affordable, dynamic and well-planned event to attend and submit their work to, versus a classic, on-the-ground conference.

The implemented conferencing technology, starting with the submission and review system and ending with the online conferencing capability, allowed CISSE to conduct a very high quality, fulfilling event for all participants.
